### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicant claims a composition, method of producing a carbon fiber reinforced composite and a carbon fiber reinforced composite produced by curing a resin composition wherein the composition comprises (1) a resin mixture comprising

- (A) an epoxy group-containing vinyl ester resin
- (B) radical-polymerizable monomer and
- (C) a curing agent comprising an organic peroxide curing agent and a curing agent for epoxy resin and

(2) a carbon fiber in strand form impregnated with a sizing agent with the sizing agent containing a vinyl ester resin, having substantially no epoxy group with the vinyl ester resin and sizing agent defined in the claims and the carbon fiber resin composite has a bending strength of 900 MPa or higher.

The closest prior art, Oosedo et al., U.S. Pre Grant Publication 2002/0007022 teaches a carbon fiber reinforced resin composite comprising a carbon reinforcing fiber impregnated in a resin composition wherein the resin composition comprises an epoxy group-containing vinyl ester resin, an imidazole (a curing agent for the epoxy resin), an organic peroxide and a polymerizable monomer. Oosedo teaches a bending (interlaminar) strength of 77.0 MPa whereas the present claims recite a bending strength of 900 MPa or higher. The present claims recite a carbon fiber with a sizing agent. The examples in the present invention show a vast difference in

Art Unit: 1794

the bending strength of the present fiber composite versus the fiber composite of the Oosedo reference due to the impregnation of the carbon fiber with a sizing agent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
